

Worldpoly63 Hydra HF

Worldpoly63 Hydra HF. Hydraulically operated and CNC controlled butt-welding machine suitable for PE and PP pipes and fittings from 36" to 63" OD. Available to weld according to ASTM, ISO 4427-2 SHP, POP003 SHP high-force Standards, on-board data logging as standard. Excellent design and construction provide a premium machine for welding both on the worksite and in the factory. Hydraulic open/close/locking of main clamps. Welding can be carried out between clamps 3 & 4 for tees, bends and manifold work.

TECHNICAL SPECIFICATIONS

Standard welding range 32" DR 9 to 63" DR 17 IPS
