

Weldpoly80 Hydra LF

Weldpoly80 Hydra hydraulically operated butt-welding machine suitable for HDPE pipes and fittings from 48" to 80" IPS and 48" to 64" DIPS. The standard machine welds to ISO 21307 SLP and DVS 2207, and has pressure, time and temperature PLC controlled, with on-board 20,000+ data logger and tablet control. Standard are hydraulic open/close locking main clamps and CNC tablet control of temperature, time and pressure. Excellent design and construction provide a premium machine for welding both on the worksite and in the factory. Welding can be carried out between clamps 3 & 4 for tees, bends and manifold work. All hydraulics are located on the main welding frame.
