

PolyRover1000 LF

Worldpoly PolyRover1000 Trench reduces workload and the need for extra support equipment on remote sites allows for faster, more efficient and consistent welding of PE and PP pipelines. Worldpoly PolyRover machines are specifically designed for use in rugged and remote terrain, easily operated and are pre-wired for the attachment of Worldpoly or other data loggers. Hydraulics are highest quality and internationally serviceable Bosch Rexroth. Electrics are all local. Absolutely Australian Made.
