POLYETHYLENE PIPE WELDING EQUIPMENT

PowerScrape1400

PowerScrape1400 is a specifically created machine for scraping large diameter HDPE pressure pipes according to the requirements for electrofusion fittings and helps you to save time and effort on the job-site. It is clamped onto the pipe wall and moves automatically around the pipe's circumference. Pipe ovality does not affect the depth of the cut. It is further equipped with a connection for industrial vacuum cleaners. The flexible construction enables a scraping length of up to 350 mm, which is ideal for electrofusion fittings d 355 - d 1400 mm.
